

## Meetings of Other Professional Organizations

**October 12, 2010:** Presentation at the New Jersey Science Convention, entitled "New Jersey Science Olympiad Trial Event: Think Like an Epidemiologist Challenge."

**March 1, 2010:** Presentation to students and teachers at the Disease Scene Investigation Workshop at the Pennsylvania State University Medical Center, entitled: "Infusing Public Health and Epidemiology Career Pathways and Education into the Capital Region." (add link, I have it)

**October 3, 2009:** Presentation at the New Jersey Science Convention entitled: "Teach Epidemiology."

**June 25, 2007:** Presentation at the Annual Meeting of the Council of State and Territorial Epidemiologists (CSTE) in Atlantic City, NJ. "Epidemiology Education Grades 6-12: Its potential for initiating Public Health Career Choices and Improving Scientific Literacy." Two movement members were invited to present at the 2007 Annual Meeting of the Council of State and Territorial Epidemiologists (CSTE) <http://www.cste.org/> in Atlantic City, NJ. The presentation was entitled, "Epidemiology Education Grades 6-12: Its Potential for Initiating Public Health Career Choices and Improving Scientific Literacy." CSTE members were interested in learning about the Movement and several in the audience told of their experiences teaching epidemiology to younger students. The presenters also discussed ways to develop specific epidemiology lessons for children that would help them understand the role of epidemiologists in the field of public health and create excitement about possible public health careers. Add link to presentation – I have it 2007 CSTE.

**November 7, 2006:** One member of the Movement gave a presentation entitled: "A Non-Epidemiologist Teaching Epidemiology: The YES Teaching Units and Some Lessons Learned" at the Consensus Conference on Undergraduate Public Health Education, Boston University School of Public Health. The need for increased epidemiology education at the undergraduate level is recognized as an integral part of advancing public health education for college students.

**October 2006:** Presentation at the National Science and Technology Week annual event held by the National Resources Canada (NRCan) that brings together some of Canada's leading science and technology experts to promote careers among young people. A Movement member presented *Buffet Busters*, a food-borne investigation for 5th graders designed to promote awareness and understanding of epidemiology.

**June 23-25, 2006:** Poster and lunchtime session at the 2006 North American Congress of Epidemiology, Seattle WA. The Congress is the largest meeting of epidemiology professionals, held every five years by the American College of Epidemiology, the Society of Epidemiologic Research, and the

Epidemiology Section of the American Public Health Association. This was an excellent opportunity to communicate activities among advocates of the Movement and to elicit feedback and ideas about future efforts in grade 6-12 education venues.

**April 2006:** Participation in educational seminars at BIOtechnology Institute held in conjunction with the BIO conference in Chicago IL. A member of the Movement “spread the word” about the Movement website and activities (see [June 2006 Movement News](#))
